### 1.2.5. Site selection

Square root of total no of farmers/2\*1,2.  $\sqrt{5146/2*1,2}= 43$  farmers + one Ics office.

### 1.2.6 Methodology of the audit time calculation

Total number of members of the Multi-site or Group:	5146
---	------

<b>Risk elements identified by the audit team for sampling methodology:</b>	Farmers are small and marginal land holders. Farmers are located in same geographical proximity and following similar production practices. They are selected randomly from different villages.
<b>Sample calculation:</b>	square root of total no of farmers/2*1,2. $\sqrt{5146/2*1,2} = 43$ farmers + one lcs office.

### 2.1.5. Methodology of the audit time calculation

2.1.15: Methodology of the audit time calculation		5146 farmers
Risk elements identified by the audit team for sampling methodology:	Risk identification is done on the basis of available information locally, maps of the area, information from ICS & based on the result of ICS risk assessments. All farmers are located in same geographical proximity & following similar production practices. As risk is identified as medium hence as per sampling methodology 35 farmers, but we audited 49 farmers during this audit.	
Sample calculation:	1+(vy/2) x 1.2 x 0.8 + one lcs office = 35 farmers to be inspected.

Category	Number of members	Attributed risk	Shared characteristics of the set
Group 1	5000	Medium	Farmers are located in the same geographical area & following similar agricultural operations, however the risk is medium.
Estimated time to evaluate the sites:			4 days with 3 auditor = 12 days
Brief justification:		Square root of number of farmers audited for Set 1 Following points are undertaken while deciding random sampling & estimate time All farmers are small holders & documentation is centrally managed. Farmers are located in same geographical proximity & following similar agricultural practices Farmers & fields are located nearby Farmers are aware of the sustainable farming requirements. No land conversion or deforestation is happened. Considering above observation, auditor can audit approximately 6 farmers per day. No risk of GMO crop is there. Less use of fertilizers and chemicals. Less risk of labour issues as child labour.	

### 3.2. RTRS Principles and Criteria

Principle	Criteria	Applicant performance
1 - Legal Compliance and Good Business Practice	1.1	Applicable laws related documents are maintained by ICS. Farmers are aware about the applicable legal requirements & laws. Farmers confirmed awareness to minimum wages, child labor, no discrimination, no harassment requirements. Applicable taxes, Electricity bills and revenue tax are paid by farmers.

#### 4.2. RTRS Principles and Criteria

Principle	Criteria	Applicant performance
<b>1 - Legal Compliance and Good Business Practice</b>	1.1	Farmers were aware to applicable laws and regulations. No deviation observed.
	1.2	Land record is available with the farmer and most of the farmer depends upon rain for irrigation purpose. Growers aware about the legal laws, and ICS office gives training about legal laws.
	1.3	Social and Environmental impact assessment is conducted by third party . A report is available in ICS office and reviewed and appropriate action is planned. Continuous improvement plan is available and done.
	2.1	No force, bonded, Child labour or discrimination was observed. Only temporary workers are working and the farmers paid to workers more than the minimum wages.

<b>2 - Responsible Labor Conditions</b>	2.2	As per farmers and workers interview, workers were hired on temporary basis and has any permanent workers on the farms. Most of the workers are illiterate. No any restriction on workers, no deduction done by farmers. ICS arrange the training to farmer and workers on fundamental rights at work, health and safety.
	2.3	Farmers provided training to workers on hazardous work, and only trained personnel is able and to done the same. Per the interview with farmers and during physical visit found that first aid kit are available to all farmers.
	2.4	Any restriction on workers. The farmers allow to workers interact with other (e.g. NGOs, trade unions, labour inspectors, agricultural extension workers, certification bodies). However, no registered union is available in this area.
	2.5	Only temporary workers are working in the farms, and the farmers pay more than the minimum wages per 8 hours of work, and the maximum hours worked are respected by employers and recorded. Potable water is provided to all workers on field.
<b>3 - Responsible Community Relations</b>	3.1	By interviewing the farmers, neighbours and villagers were possible to verify the level of training. This was made verbally as all the communications, due to due to the fact that most workers are illiterate, and recorded and maintain in ICS office.
	3.2	All farmers use legal land and respect the rights, customs and culture of indigenous peoples, also most of the farmers are indigenous.
	3.3	Complaints and grievances procedure is mention and documented in ICS manual and all complains are recorded in Complaint register maintained at ICS. In this harvest, no complaints were registered.
	3.4	All workers are from same or nearby villages and ICS provided training to all workers and farmers. Farmers purchase all inputs locally.
<b>4 - Environmental Responsibility</b>	4.1	Review on the agricultural, environmental and social assessment has been conducted by third party with trained and experienced for this, done with comprehensive and transparent based on research carried out with group members. Also all documents available for verification on request.
	4.2	All farmers are small holders and purchase fuel and other pollutants on need basis, with no storage in the farms. Farms waste are used as FYM and Soya waste as animal feed and on your own property. ICS provided training to farmers on residue management. No evidence of burning was found.
	4.3	Fossil fuel used records maintain farm diary and farmers confirmed that fuel use is not increase. As per the interview was able to found out that soil quality was analysed and test report were available to substantiate the same. Native vegetation and forest areas are left untouched and there are government support mechanism for planting of trees. Ground covers are also maintained by the farmers.
	4.4	No expansion on non agricultural area has been done since 2009. Farmers use their agricultural land to produce soybean and no agricultural operations are carried out in riparian zone. The cultivation is carried out by more than 30-40 years. Were available satellite Images in KML file that were verified.
	4.5	Farm maps images of native vegetation were available in KML file and possible to be verified through Google Earth
	5.1	ICS has been provide trainings on Good Agriculture practices to farmers follow crop rotation practices and they conduct soil testing every year. No irrigation used for soybean, the farmers depend upon rain.
	5.2	All water course was identified in the maps and internal farmers registers and no vegetation is removed from the area. No wetland identified in the area.
	5.3	The soy analysis is done, including organic matter monitoring. Also the crop rotation is done and soil buds are maintained for soil conservation.

5 - Good Agricultural Practice	5.4	Manufacturers and ICS recommendations are followed by the farmers. IPM plan is documented at ICS office, Pheromone traps, crop rotations, chemical controls & homemade organic controls have been followed to control pests. Harmful products are not used by farmers and they only use original and recommended agrochemical in the field. Records of monitoring of pests, diseases & weeds are maintained
	5.5	The records with all necessary information are maintained in the farm diaries. Farmers purchased agrochemicals only from registered sellers and the bills are available for verification; this acquisition is made only when needed and by trained person, and also the transportation and storage is done correctly, including the disposal of empty containers that is done rightly. Farmers used fertilizers as per recommendation in the soil analysis reports.
	5.6	Paraquat not used by any farmer, however Paraquat is Banned by Indian government
	5.7	Farms do not use the biological control system.
	5.8	Agricultural department is responsible to identify and monitor invasive species and outbreaks of existing pests. Farmers follow recommendations issued by agricultural department in case of major outbreaks.

## 5.2. RTRS Principles and Criteria

Principle	Criteria	Applicant performance
1 - Legal Compliance and Good Business Practice	1.1	Farms have knowledge on applicable laws and they are complied with. Employees demonstrated knowledge of legislation and relevant documents were available. The audited farms also have a knowledge on safety, health and environment issues. Currently, they fully comply with legislation and good business practices.
	1.2	Legal land use rights are defined and demonstrated in documents such as land tenure registrations or lease agreements, Farmers keeping legal land documents which is issued by Indian Government and Local Government.
	1.3	Social and Environmental impact assessment conducted by third party, which is available in ICS office. The assesment was reviewed and an appropriate action plan regarding this assessment has been made. Continuous improvement plan is available and is being carried out through action plans, defined indicators and monitoring, showing the group's commitment to meet all the criteria and indicators of the RTRS standard.

<b>2 - Responsible Labour Conditions</b>	2.1	No force, bonded and Child labour was observed. Only temporary workers are working in the farms and they receive more than the minimum wages. No evidence of forced, compulsory, slave or involuntary labour was found during the audit process in the work environments or heard during interviews with employees of the audited farms.
	2.2	As per farmers and workers interview, most of the workers are hired temporary, so there's no any permanent personnel working on the farms, most of these are illiterate. no restrictions for workers and no salary deductions were made by employers. ICS arrange the training to farmer and workers on fundamental rights at work, health and safety.
	2.3	Hazardous works are handled by farmers and as per the interview with farmers and workers, all are aware about the health & safety risks and using PPEs. First aid kits were available in all audited farmers.
	2.4	All employees are hired only when necessary, based on the daily needs of the producers. There is no presence of labor unions. All workers are free to leave their job anytime. Workers are not prevented from having freedom of association and rights to collective bargaining, as well as the impediment regarding their presence in the agricultural unit.
	2.5	Legal minimum wages are provided, the information is available in farm dairies. Wage remuneration records show that the salaries paid in the company are higher than the national minimum wage, with no salary differences between employees in the same category. As there are only temporary workers on the farms, there is no need to provide housing.
<b>3 - Responsible Community Relations</b>	3.1	All farmers are small holders. Communication for farm activities & operation is made verbally. ICS has provided trainings to villages along with member farmers & workers on RTRS. In the farmer diaries was observed that all communication is in verbally and training record maintain in ICS office. Communication takes place through communication channels such as a telephones, postal addresses on the farms' roads with advertising signs written "contact us".
	3.2	No traditional land users and disputes were found in the assessed area. Documentation of ownership of the property such as registration and lease agreement were presented and is in accordance with applicable legal requirements.
	3.3	Complaints and suggestions mechanism is made available, which establishes a procedure for recording and handling complaints, through a complaints and claims form, available at the production units, and all interested parties are made aware of this mechanism. Complaint registers are maintained at ICS office. So far, no complaints have been received.
	3.4	The hired workers come from communities close to the farms and vacancies are advertised through the employees themselves in the local community, where the interested party comes to the company and inquiries for job. There are actions that encourage the development of communities close to the scope farms, carried out by the farms and monitored by Arvind limited.
<b>4 - Environmental Responsibility</b>	4.1	Social, Agriculture & Environmental Impact assessment for Soyabean cultivation in Maharashtra state is conducted by third party organisation on behalf of ICS.
	4.2	All farmers are small holders. Fuel is not stored, it is bought whenever required and used immediately. Farm waste use as FYM and Soya waste as animal feed.
	4.3	The records of fossil fuel use are present in the farms' diaries, there was no increase in the use of fuel. As per the interview with farmers they confirmed that the soil quality was analysed and test report were available to substantiate the same. Native vegetation and forest areas are left untouched and there are government support mechanism for planting of trees. Ground covers are also maintained by the farmers.
	4.4	No expansion on non agricultural area has been done. Farmers use their agricultural land to produce soybean. No agricultural operations are carried out in riparian zone. The cultivation is carried out by more than 30-40 years. Satellite Images(KML maps) were verified.

	4.5	Farm maps with illustration of native vegetation were found KML Map developed through Google Earth.
5 - Good Agricultural Practice	5.1	The farmers follow practices like crop rotation and oil sampling. No irrigation used for soybean, most of farmers depend upon rain. The audited farms demonstrate good agricultural practices (erosion control, direct planting, terraces to contain rainwater, drainage channels, proper application of pesticides and fertilizers, etc.) surface and underground.
	5.2	All water course was identified and no vegetation is removed from the area. No wetland identified in the area. Smallholders farmers with average land holding less than 4 ha, Native vegetation like local plant species are maintained by the farmers.
	5.3	Soil testing done by ICS. The topography of the area is flat, bunds are maintained around the farms, there is no chances of soil erosion in this area. Farms adopt good agricultural practices, perform soil analysis, checking soil qualities and deficiencies and correcting when necessary. Erosion control and crop rotation techniques are properly implemented.
	5.4	Storage and transport of agrochemicals and hazardous substances within legal requirements. There are boards with product information and re-entry period for recently sprayed areas. The pesticide application records are made manually and later registered in the system. All farmers are provided with farm diaries with provision to records fertilizer and pesticide application details. Manufacturers and ICS recommendations are followed by the farmers. The farmers use only registered agrochemicals which are available in the market.
	5.5	The farmers keep the information updated about Agrochemical in their diaries with the following information's: amount purchased, applied quantity, date of application and area of application. The responsible person for the application and used equipment information, are also in the records. Weather condition for application are recorded by the farmer. During the interviews with the farmers, it was observed that most of the farmers bought agrochemicals as when required and had a good knowledge of the disposal process of agrochemicals containers. Farmers washed empty chemical containers three times. Some farmers have a chemicals storage which is locked with key. Farmers hosting red coloured flag to avoid people entering to areas where chemicals have been placed. Fertilizers are used based on the soil test reports and guidance from ICS staffs.
	5.6	Paraquat not used by any farmer, however Paraquat is Banned by Indian Govt.
	5.7	N/A - No use of biological control agent.
	5.8	Indian department is responsible to identify and monitor invasive species and outbreaks of existing pests. Farmers follow recommendations issued by agricultural department in case of major outbreaks. Presented methodology designed to identify and monitor new pests and introduced invasive species, or major outbreaks of existing pests. There were no incidences of new pests that are not identified, according to the records presented.
	5.9	Smallholder farmers, only limited quantity of pesticides are applied. The Good agriculture practices document maintained and implemented on farm like Crop rotation. Minimum uses of chemicals, waste disposal, and no crop residue burning and buffer zone maintained by farmers. No spray application in this region.
	5.10	Farmers following similar agricultural practices. No GM soybean is available in India, All purchased seed come from known legal quality sources, Also neighbouring areas farmers use the same type of production system.
	5.11	All purchased seeds are certified and some farmers used their own seeds, which remain from last
Annex I: Chain of Custody	1.1	Chain of custody requirements are outlined in chain of custody manual MU/RTRS, General Chain of Custody System Requirements are being met. The farms are trained and suitable to sell certified soy through the chain of custody and through the credit trading platform centralized by the Group Manager. There is no handling of soybeans grown by third parties.
	2.1	This unit will procure the soy from the registered farmers of the group only. So far there has been no sale of certified physical soy only credits are sale. All harvested data maintain in Farm dairy.

System requirements for Producers	2.2	Chain of custody requirements are outlined in chain of custody manual MU/RTRS. The group will trade credits via the RTRS trading platform. Last year details were verified on Platform.
	2.3	Individual producers are not allowed to sell soybean. Requirements for producers are outlined in Choc manual.
	2.4	There is a record management system for all records and reports, including purchase and sale documents, training records, production records and volume summaries, valid for 5 years.

### 5.3. Group and Multi-site requirements

Principle	Applicant performance
<b>1 - Group elements</b>	Group is managed by an organization - Arvind Limited - The elements of the group are defined, where the group manager is represented by an organization, responsible for ensuring compliance with the standards and requirements by the group and by the farms in the scope. A Group legally registered entity as a proprietorship company. The group is formed as an ICS under the same legal entity. ICS Manual is available and updated. No limit or restriction set by ICS on members, All farmers are following similar agricultural production system. The farmers of RTRS programme demonstrated knowledge and compliance with applicable RTRS regulations. The organization's staff is trained annually in the RTRS requirements. ICS manager also have a good knowledge on RTRS standard. GMO soybean is not available in India.
<b>2 - Group and multi-site management procedures</b>	The group manager's procedures to establish, implement and maintain written procedures in relation to his managerial status, are described in the organization's manual and displayed on informational murals on the farms, covering all the relevant requirements of this standard, evidenced by the performance during the audit. Organizational structure available in ICS Manual, Responsibilities of group manager and group members are define, Rules and regulation of group, Sanction and withdrawal procedure, eligibility for members, policies are available in ICS manual. All the farmers signed the Farmer agreements, which serve on purpose of consent. Agreements comprise organization requirements.
<b>3 - Control and monitoring of member/site compliance</b>	The group manager has implemented a program of internal audits, defined in the organization's group management manual, which consists of an initial internal audit on all farms and an annual monitoring audit to verify compliance with the standard by the members of the group. 100% internal inspection was done in 2021-22 and ICS planned 100% internal inspection for next 5 year cycle. No members were excluded from certification. As mentioned in the ICS Manual, In case of exclusion of farmer from group, producer will not be considered and sold as RTRS certified soybean.
<b>4 - Record keeping</b>	All old records are maintain by ICS, available for verification. Farmers list is maintained with name, contact details, size of farm, Soybean area and village name. Map of farms and other relevant records are maintained. Every member/Farmer used farm dairy and he keep up to date.
<b>5 - Chain of Custody</b>	As per procedure mentioned in the ICS manual, only ICS is authorized to sell certified soybean. Individual group members are not authorized to sell certified soybean. The certified scope production units meet the General requirements of the Chain of Custody System for Producers.
