1.2.4. Stakeholder Consultation Process

They are working in this region on the improvement of groundwater levels, rainwater harvesting, and Good Agriculture Practices. He gave positive comments. After starting the project field officers regularly visited the villages and guided Good Agriculture Practices, how to minimize expenses, and RTRS certifications. As discussed Silver Angel is working on improving better employment opportunities, increasing the income of farmers, and working for better education facilities in the area.

1.2.5. Site selection

Risk identification is done based on available information locally, maps of the area, information from ICS and based on the result of ICS risk assessments. All farmers are located in the same geographical proximity and follow similar production practices. As risk is identified as low, the sampling methodology is 48 farmers.

1.2.6 Methodology of the audit time calculation

| | |
|---|---|
| Total number of members of the Multi-site or Group: | 7000 |
| Risk elements identified by the audit team for sampling methodology: | Risk identification is made based on locally available information, area maps and information obtained from the ICS and the result of the ICS risk assessment. All farmers are located in the same geographical proximity and follow similar production practices. As per the sampling, there are 42 farmers which are identified as low risk in the calculator but more details like yield estimation and actual farming practices needed to be verified during the audit so 48 farmers were inspected. Farmers are not so far it's available in the same villages which were already selected for sampling and in the closing meeting Gave the same explanation to the auditee. |

| Estimated time to evaluate the sites: | | | 9 days |

| | |
|------------------------------------|---|
| <p>Brief justification:</p> | <p>All farmers are small holders & documentation is centrally managed. Farmers are located in same geographical proximity & following similar agricultural practices. Farmers & fields are located nearby. Farmers are aware of the sustainable farming requirements. No land conversion or deforestation is happened.</p> <p>Considering above observation, auditor can audit approximately 6 farmers per day.</p> <p>No risk of GMO crop is there. Less use of fertilizers and chemicals. Less risk of labour issues as child labour.</p> |
|------------------------------------|---|

1.3.1. RTRS Principles and Criteria

| Principle | Criteria | Applicant performance |
|---|------------|---|
| <p>1 - Legal Compliance and Good Business Practice</p> | <p>1.1</p> | <p>Group is managed by an organization- Silver Angel Impex Limited, a legally registered entity as a limited company. The group is formed by an ICS under the same legal entity. Certificate of incorporation with Corporate ID number U51100DL2009PLC188227 issued by the Ministry of Cooperative affairs was verified. Farms know applicable laws and they are complied with. Employees demonstrated knowledge of legislation and relevant documents were available. Audited farms also know safety, health, and environmental issues. Currently, they fully comply with legislation and good business practices.</p> |
| | <p>1.2</p> | <p>Farming is done on legally owned land. Land ownership documents are available with farmers, the same can be verified Maharashtra Government website- mpbhulekh.gov.in. ICS has a copy of the land document available at the office. Legal land use rights are defined and demonstrated in documents such as land tenure registrations or lease agreements. Farmers keep legal land documents that are issued by the Indian Government and Local Governments.</p> |

| | | |
|---|-----|---|
| | 1.3 | Training is given to farmers in improvement areas and farmers are found aware of the requirements. Social, agriculture and environmental impact assessment for soybean cultivation in Maharashtra state is conducted by the third-party organization Welspun on behalf of ICS. Mr Sushil Punia & Mr Sarfaraj Sayyad from SAI PVT LTD conducted the assessment, both graduated in Environmental Science and have a good experience in agriculture and working on climate Smart Agriculture. During the assessment, it was considered the following indicators i.e soil health, riparian zone, rivers, forest, community and environment. |
| 2 - Responsible Labor Conditions | 2.1 | No forced, bonded or child labour was observed. Only temporary workers are contracted and farmers paid workers more than the minimum wages. No evidence of forced, compulsory, slave, or involuntary labour was found during the audit process in the work environments or heard during interviews with employees of the audited farms. |
| | 2.2 | According to farmers and workers interviewed, the workers are hired temporarily, no permanent workers are working on the farms. Most of the workers are illiterate. No restriction on workers, no deduction done by farmers. ICS arranges training for farmers and workers on fundamental rights at work, health, and safety. Workers have the right to join any workers union. |
| | 2.3 | As per the interview with farmers, it was observed that only spraying activity is carried out as hazardous work, and the farmers themselves and the workers who have experience are involved in such activities as spraying. Farmers are using spraying coats, masks, and gloves as PPE. PPE is given to workers if they are employed. |

| | | |
|-----------------|-----|--|
| | 2.4 | Unions are not available in the region. Negotiation is done by the workers with farmers on the wages are they are agreed upon mutually. Wages are given based on the village-level agreements. |
| | 2.5 | Legal minimum wages are provided. There is available a farm diary to register the working hours of workers. All workers are getting 350 INR for 6-7 hours of work. The minimum wage for the agriculture sector in Maharashtra is 350 INR for 8 hours. Only temporary workers are employed as per need. No overtime activity is carried out. |
| 3 - Responsible | 3.1 | All farmers in the group are smallholders. Communication regarding farm activities and operations is made verbally in the communities. ICS has provided training to villages along with member farmers and workers on RTRS. ICS maintains a communication channel between stakeholders, interested parties, and farmers. Communication records are available for verification. |
| | 3.2 | Through the verification of land records like Form B-1, Khasara, and interviews with farmers, any disputed case was found. Farming is carried out on own agricultural land only, also it was observed that agriculture is been done for the last 30-40 years in the area. |

| | | |
|---------------------|-----|--|
| Community Relations | 3.3 | The complaint procedure is defined in ICS Manual, they also register and maintain the complaints received at the ICS office. No complaints were received so far. However, farmers are aware of the ICS complaint mechanism. |
| | 3.4 | ICS has provided training to the farmers, workers, and villagers on sustainable agriculture. As per the interview, the training is carried out in villages and anyone from the village can attend the session. They maintain the training records, and also was made interviews with farmers, workers and villagers to confirm their knowledge. All farmers are smallholders, so agricultural inputs like seeds, fertilizers, and pesticides are sourced locally. Verification of input purchase receipts. |
| | 4.1 | Social, Agriculture & Environmental Impact assessment for soybean cultivation in Maharashtra state is conducted by the third-party organization Welspun on behalf of ICS. Mr.Sushil Punia & Mr. Sarfaraj Sayyad from SAI PVT LTD conducted the assessment. Both graduated in Environmental Science and have a good experience in agriculture and working on climate-smart agriculture. The report is available and available for verification and it was done in a comprehensive manner. All factors impacting sustainable soybean farming are identified in the assessment. |
| | 4.2 | All farmers are small and marginal landholders. Fuel is not stored, it is bought whenever required and used immediately. Agricultural waste is decomposed and used as Farm Yard Manure. Empty agrochemical containers are disposed of in barren land. During field visits, however, farmers confirmed that oil is reused in the bullock cart, seed drill machine, spray machines, etc. A small quantity of oil is required as the farmers have small land holdings. Oil is not stored, it is used immediately when brought. Burning of crop residue or vegetation clearance through burning is not carried out. Crop residue is incorporated into the soil to improve soil organic matter. Burning is legally prohibited. It was verified during interviews with the farmers, ICS records, and observations during field visits, that farmers are aware of the residue management concerning agricultural waste. |

| | | |
|----------------------------------|-----|--|
| 4 - Environmental Responsibility | 4.3 | <p>The farmers are aware of the usage of fossil fuels. The only fossil fuel used in agriculture is diesel. Details about the use of fossil fuels are recorded in farm diaries that were verified during the audit. Farmers confirmed that fuel use is decreasing every year. Irrigation was shifted to electrical motors and the solar trend also increased. Fuel-efficient tractors and equipment are used for farming. As this group is formed by smallholder farmers, ICS has taken soil samples and the results were communicated to farmers. Verification was made through Interviews with the farmers, ICS, and verification of soil test reports. Native plant species are enhanced and planted to increase carbon sequestration. It was observed during field visits, that ground covers are also maintained by the farmers.</p> |
| | 4.4 | <p>No expansion on non-agricultural areas has been done. Farmers use their agricultural land to produce soybean for more than 30-40 years. No agricultural operations are carried out in the riparian zone. KML maps for fields of all farmers are available for verification and it was possible to verify that farmers used only agricultural land for farming. Also, legal documents of Land records- 7/12 and 8, form B1, and Khasara number were verified during the audit.</p> |
| | 4.5 | <p>There are Farm maps with illustrations of native vegetation and KMLs were available through Google Earth. Training is provided by ICS to the farmers on the importance of biodiversity & native vegetation. Training records were verified and an interview with the ICS manager was done to verify the information. Hunting of wild animals/rare, threatened or endangered species is not done and is legally banned. Awareness of this legal requirement is demonstrated in the interviews with farmers and workers. These are very small and marginal farmers, farm bunds and trees available on the farm are maintained and where the riparian buffer is also maintained.</p> |
| | 5.1 | <p>A plan is available to monitor the risk identified concerning Good Agricultural Practice. Most farmers depend on rainfed and furrow irrigation is done when required. There is no water scarcity in the project area. ICS has trained farmers on good agricultural practices. Soil bunds are maintained, and shallow tillage practices are followed to reduce soil erosion. Agrochemical application is done to the intended area. No groundwater contamination was observed by the ICS or farmers through physical verification.</p> |
| | 5.2 | <p>Watercourses like rivers are identified in the farm maps. All farmers are smallholders with an average land holding. Native vegetation like local plant species is maintained by the farmers. No vegetation is removed from the riparian area. Conservation of vegetation was verified through farm maps and interviews.</p> |

| | | |
|---------------------------------------|-----|---|
| 5 - Good Agricultural Practice | 5.3 | <p>Soil testing is done by ICS. The topography of the area is flat, bunds are maintained around the farms, and there is no chance of soil erosion in this area. Soil samples are collected for 10% of the total group members. Samples are analyzed in Reliable Analytical Lab. Original reports are given to farmers. During the field visit reports are available with farmers for verification. Report no.RAL/THW/SW20070001, Name of the Farmer- Mr Babarav Champatrav Pipare, Date: 29-July-2021 was verified during the audit. Farmers are aware of ICM & IPM techniques. Farmers use on the farm prepared organic pesticides. After training on GAP farmers started to reduce the use of Agrochemicals. Normally they use chemicals on a requirement basis. Shallow tillage practices are followed and green cover is maintained to reduce soil erosion. The farmers take 2-3 crops in a year: Soya - Wheat and Moong Dal and Maize.</p> |
| | 5.4 | <p>The farmers are aware of Integrated Pest Management, integrated nutrient management, and integrated crop management plans. The farmers are using light traps, crop rotations, chemical controls, homemade organic controls, etc. The documented plan is available in the ICS, named ICSMANUAL/SILVERANGEL/ICM/005</p> <p>Checked the farm diary, interviews with farmers and observed during field visits.</p> <p>Harmful products are not being used. Only registered and less hazardous products are used. Manufacturers and ICS recommendations are followed by the farmers, and only registered agrochemicals that are available in the market are used. However, purchase bills were not kept by the farmers.</p> |
| | 5.5 | <p>All farmers are provided with farm diaries with provision to records fertilizer and pesticide application details. Manufacturers and ICS recommendations are followed by the farmers. Are used only registered agrochemicals which are available in the market. Farm records are found updated with Agrochemical purchased, applied quantity, date of application and area of application. Provision is given in the farm records to maintain the records like person involved in agrochemical application, equipment used and name of the person who applied.</p> |
| | 5.6 | <p>Only legally approved chemicals are used by farmers. No use of paraquat as explained by farmers during field visits. No agrochemicals listed in the Stockholm & Rotterdam conventions are used. The same information is verified in farm dairies.</p> |
| | 5.7 | <p>No Biological control agents are used for pest control, in the other hand farmers are aware of different pest and their biological control.</p> |

| | | |
|--|------|---|
| | 5.8 | The agricultural department is responsible to identify & monitor invasive species & outbreaks of existing pests. Farmers follow recommendations issued by the agricultural department in case of major outbreaks. As discussed with farmers and ICS Staff no Major Pest attack or Out break happened. |
| | 5.9 | Good agricultural practices are defined & documented by ICS. Soil bunds are maintained around farms and no aerial agro-chemical spraying was identified. ICS have a guideline on the Spraying of Agrochemicals, Same is communicated through training with Farmers. |
| | 5.10 | Farmers following similar agricultural practices. Soil bunds are made to prevent contamination from neighbouring plots and GM soybean is not available in India. ICS provided training to farmers on how to maintain buffer zone. |
| | 5.11 | Farmers use seeds from the previous year's harvest and also purchased from the local market. Seed purchase bills were available with farmers and were verified. On the bill mention of Purchase date, Variety, quantity and Name of the Vendor. Some farmers used their seeds from previous year's productions which are legally allowed in India. |
| Annex I: Chain of Custody System Requirements for Producers | 1.1 | This is the initial audit for this client. The chain of custody requirements will be applicable for this unit, till the audit date procurement was not done, but in the ICS manual Procedure for the General Chain of custody is mentioned. Training are provided by the ICS to farmers, as the interview with farmers they have good knowledge on same. |
| | 2.1 | This is the initial audit for the unit. The specification of the requirement is defined in the Manual. During the audit, the draft invoice was verified and it was found with Name, Address, Quantity, Issue date, quantity sold, RTRS CoC number and other related information mentioned. |
| | 2.2 | The specification of the requirement is defined in the Manual. During the audit, draft documents were verified. There are the transport documents called "Lorry Receipt(L.R). LR" and it is linked with the Invoice. All required details are available on the transcript. L.R no. 1 was verified during the verification. <u>Till the audit, the ICS has not procured any material, but the procedure to</u> |
| | 2.3 | Initial Audit. The organization have a system to maintain data in Excel files. They have a system to trace data from farm to Factory gate. As per the interview, it's confirmed to keep the records for 5 years and is mentioned in the ICS manual procedure. |
| | 2.4 | Initial Audit. The specification requirements are defined in the Manual. As discussed with the ICS manager they will send all RTRS certified material with Corresponding RTRS claims on their sales and transport documents. |

1.3.2. Group and Multi-site requirements

| Principle | Applicant performance |
|-----------|-----------------------|
|-----------|-----------------------|

| | |
|---|---|
| 1 - Group elements | <p>Group is managed by an organization Silver Angel Impex Limited, a legally registered entity as a limited company. The group formed an ICS under the same legal entity. Certificate of incorporation with Corporate ID number U51100DL2009PLC188227 issued by the Ministry of Cooperative affairs was verified. Farms know applicable laws and they are complied with. Employees demonstrated knowledge of legislation and relevant documents were available. The audited farms also know about safety, health and environmental issues. Currently, they fully comply with legislation and good business practices.</p> |
| 2 - Group and multi-site management procedures | <p>Group managed by Silver Impex. The organization has appointed employees with roles & responsibilities. All staffs have experience in ICS functions and standards like Organic, BCI and RTRS. Rules, procedures & responsibilities are documented in the ICS manual with number Document No 1, also the organization chart is documented in the ICS manual. Responsibilities are defined on pages number 7-8 of the ICS Manual. Internal control system is established to ensure compliance with applicable requirements. Rules regarding the eligibility of members of the group, Withdrawal and suspension of group members, deadlines for NC closures, procedures of inclusion of new group members, Complaint procedure, management use and disclosure of group members' information are mentioned in the manual. Farmers' training is organized by the ICS. Training on topics like RTRS requirements, GAP, Agricultural practices, and social & environmental requirements are imparted to the farmers.</p> |
| 3 - Control and monitoring of member/site compliance | <p>Starting the season ICS plan all RTRS-related activity on prior and the internal inspection. In 2021 was done the internal audit and also the report from this verification was verified. The ICS planned to conduct 100% the internal inspections in a 5-year cycle. To date, no members were excluded from certification. As mentioned in the ICS Manual, In case of exclusion of farmer from the group, produce will not be considered & sold as RTRS certified soybean.</p> |
| 4 - Record keeping | <p>All old records are maintained by ICS, As per the ICS manual ICS has a system to maintain data for 5 years, ICS started the same for this year. Group member's details maintain in the Farmer list and it's available for verification. Farmers list maintained with name, contact details, size of the farm, Soybean area and village name etc. KML Map of farms & other relevant records are maintained in ICS office, Farmers also maintain all records in farm dairy and it's available with farmers at the time of visit.</p> |

| | |
|-----------------------------|---|
| 5 - Chain of Custody | The initial year of certification. No purchase of certified material to date. The procedure for purchasing certified material is available in the ICS manual and there is a system to maintain the general requirements of the Chain of Custody. Also, ICS have a procedure to issue the invoice for every purchase or sale. During the audit, the Invoice was verified that contained the Date, Purchase or Sold quantity, Name of the Organization and name of the seller mentioned. Also, the procedure for maintaining transport documents. During the audit, Lorry Receipts were verified. |
