1. Initial Assessment General Details

Organization Name:	Landmark Agri Exports Private Limited
Country:	India
Contact person:	Mr. Jitendra Mandrah
RTRS Standard used for the assessment:	RTRS Indian National Interpretation Version 2.0
	RTRS Responsible Soy Production Standard Version 3.1
	RTRS Group and Multi-site Certification Standard Version 3.1
Assessment Type:	Group
Partial certification:	No
Audit dates:	25 a 29/09/2021
Total area (ha):	10081,64
Cultivated total area (ha):	9406,24
Estimated Production (Tonnes):	-
Real Production (Tonnes):	17602,46

1.2. Assesment process

1.2.1. Assessment team

Role	Name	Qualifications (including field of expertise)
Lead Auditor	Niketan Patil	Bachelor of Business Management in Agriculture, M.B.A in Marketing, 5 year Job experience out of this 4 year experience of Sustainable and Organic certification auditing like RCI, PepsiCo-SFI, Sustainable Castor Initiative, NPOP,NOP),FSA, Palm Oil, SRP etc.
2nd auditor	Sudeep Nair	M. Sc Informatics 13 years experience of certification auditing like Organic farming (NPOP, NOP, EU), UTZ, RSPO, Trustea, FSA and Bonsucro.

1.2.2. Certification

Certificate code:	RTRS-CUC-AGR-COC-0099
CUC Certificate Code:	C880253RTRS.AGR-01.2022
Issueance date of the first certificate:	18/05/2022
Estimate period for the next audit:	07/08/2022

1.2.3 Assessment agenda

Date	Time	Site	Activity
25.09.2021	09:00 - 09:30	ICS office	Opening Meeting

25.09.2021	09:30 - 12:00	Biaora mandu And Diwad	Field Visit (4 farmers by 2 Sudeep and 2 By Niketan)- RTRS Responsible Soy Production Standard. Version 3.1 Including Annex I RTRS Group and Multi-Site Certification Standard Version 3.1 RTRS Non-GMO Module Requirements for Producers Version 1.0 Indian National Interpretation for the RTRS Standard for Responsible Soy Production v2.0
25.09.2021	13:00 to 18:30	Biaora mandu and Amgarha	Field visit- 6 farmers (RTRS Responsible Soy Production Standard. Version 3.1 – 01/06/2017 Including Annex I - General Chain of Custody System Requirements for Producers RTRS Group and Multi-Site Certification Standard Version 3.1– 31/05/2018 RTRS Non-GMO Module Requirements for Producers Version 1.0 – 26/04/2018 EN Indian National Interpretation for the RTRS Standard for Responsible Soy Production v2.0)
26.09.2021	09:30 to 12:00	Dhakani and Eklara	Field visit- 5 farmers (RTRS Responsible Soy Production Standard. Version 3.1 – 01/06/2017 Including Annex I - General Chain of Custody System Requirements for Producers RTRS Group and Multi-Site Certification Standard Version 3.1– 31/05/2018 RTRS Non-GMO Module Requirements for Producers Version 1.0 – 26/04/2018 EN Indian National Interpretation for the RTRS Standard for Responsible Soy Production v2.0)
26.09.2021	12:00-13:00	Lunch	0
26.09.2021	13:00 to 18:00	Eklara and Dhanora	Field visit- 5 farmers (RTRS Responsible Soy Production Standard. Version 3.1 – 01/06/2017 Including Annex I - General Chain of Custody System Requirements for Producers RTRS Group and Multi-Site Certification Standard Version 3.1– 31/05/2018 RTRS Non-GMO Module Requirements for Producers Version 1.0 – 26/04/2018 EN Indian National Interpretation for the RTRS Standard for Responsible Soy Production v2.0)

27.09.2021	09:30 to 12:00	Taleni and Taraganj	Field visit- 5 farmers (RTRS Responsible Soy Production Standard. Version 3.1 – 01/06/2017 Including Annex I - General Chain of Custody System Requirements for Producers RTRS Group and Multi-Site Certification Standard Version 3.1– 31/05/2018 RTRS Non-GMO Module Requirements for Producers Version 1.0 – 26/04/2018 EN Indian National Interpretation for the RTRS Standard for Responsible Soy Production v2.0)
27.09.2021	12:00-13:00	Lunch	0
27.09.2021	13:00 to 18:00	Taraganj and Bilodpurabiya	Field visit- 6 farmers (RTRS Responsible Soy Production Standard. Version 3.1 – 01/06/2017 Including Annex I - General Chain of Custody System Requirements for Producers RTRS Group and Multi-Site Certification Standard Version 3.1– 31/05/2018 RTRS Non-GMO Module Requirements for Producers Version 1.0 – 26/04/2018 EN Indian National Interpretation for the RTRS Standard for Responsible Soy Production v2.0)
28/09/2021	09:30 to 12:00	Village Representative- Saharanpur	Stakeholder consultation (RTRS Responsible Soy Production Standard. Version 3.1 – 01/06/2017 Including Annex I - General Chain of Custody System Requirements for Producers RTRS Group and Multi-Site Certification Standard Version 3.1– 31/05/2018 RTRS Non-GMO Module Requirements for Producers Version 1.0 – 26/04/2018 EN Indian National Interpretation for the RTRS Standard for Responsible Soy Production v2.0)
28/09/2021	12:00-13:00	Lunch	
28/09/2021	13:00 to 18:00	ICS office	Document verification and review (Stakeholder consultation (RTRS Responsible Soy Production Standard. Version 3.1 – 01/06/2017 Including Annex I - General Chain of Custody System Requirements for Producers RTRS Group and Multi-Site Certification Standard Version 3.1– 31/05/2018 RTRS Non-GMO Module Requirements for Producers Version 1.0 – 26/04/2018 EN Indian National Interpretation for the RTRS Standard for Responsible Soy Production v2.0)
29/09/2021	09:30 to 12:00	ICS office	Audit Summarization
29/09/2021	12:00 – 13:00	ICS office	Closing Meeting

1.2.4. Stakeholder Consultation Process

Landmark Agri involve in various types of local work, like providing training to farmers and how to increase net profit and working on Health and Education. Also, the company is very helpful to increase the income and minimise the cost of production in the village. Positive comments were received from the stakeholders

1.2.5. Site selection

Risk identification is done based on available information locally, maps of the area, information from ICS and based on the result of ICS risk assessments. All farmers are located in the same geographical proximity and follow similar production practices. As risk is identified as low hence as per sampling methodology 31 farmers.

1.2.6 Methodology of the audit time calculation

Total number of members of the Multi-site or Group:	2692
Risk elements identified by the audit team for sampling methodology:	Risk identification is done on the basis of available information locally, maps of the area, information from ICS and based on the result of ICS risk assessments. All farmers are located in the same geographical proximity and follow similar production practices. As risk is identified in Calculator as Low hence as per sampling is 31 farmers.
Sample calculation:	According to RTRS Calculator for Initial Group Certification - 31 farmers + 1 internal control system
Sites randomly selected	
Name of Unit	Address
Uttam singh	Digwad
Suraj singh	Digwad
Ramesh rao	Digwad

Category	Number of members	Attributed risk	Shared characteristics of the set
Group 1	2692	low	All farmers located in same geographycal proxymtete, No Conflict with land found, No expansion for soy, No high levels of deforestation or native vegetation clearance for agriculture in the region.
Estimated time to evaluate the sites:			Total 10 Man-days required for Farm verification, ICS documentation, Stakeholders Consultation and Review. Total 2 auditors for 5 days of auditing.
Brief justification:			Farmers are located in the same geographical area and follow similar agricultural operations, Farmers are selected based on Land Size, Employee Size and Location. In India GMO risk in Soybean is zero.

1.3.1. RTRS Principles and Criteria

Principle	Criteria	Applicant performance
1 - Legal Compliance and Good Business Practice	1.1	As per the interview with farmers, they are all aware of the applicable laws not having child labour, discrimination and wildlife degradation. Farmers pay wages more than the minimum wages to the temporary employees and also, have a good knowledge of the local law as well as RTRS principles.
	1.2	Farming is done on legally owned land. Farmers are aware of the Land use and they have the ownership documents, that are available to farmers and can be verified on the Madhya Pradesh Government website- mpbhulekh.gov.in. ICS have a copy of the land document available at the office.

	1.3	Social, Agriculture and Environmental Impact assessment done for Soyabean cultivation in Madhya Pradesh state and conducted by SAEIP Gujrat, this is an organisation that conducts the Environmental and Social Impact Assessment. Training is given to farmers on improvement areas and farmers are found aware of the requirements.
2 - Responsible Labor Conditions	2.1	Only temporary workers are employed on the farms and they are from local villages. No forced, compulsory, bonded or involuntary labours were observed. A mutual agreement between the worker and the farmer is made, also nothing relating to the workers, such as identity, salary or property, is retained with the employer. All workers are treated equally, children are not employed on the farm and under-ages 18 are not employed Men and women workers are paid equally for equal work, moreover, farmers pay workers more than minimum wages.
	2.2	Written agreements are not available due to the high rate of illiteracy. Temporary workers are employed during agricultural operations whenever needed more help with the crops. Wages are mutually agreed upon between farmers and workers, also farmers pay more than the minimum wages to workers as per agreed, it is more than local minimum wages. The ICS has arranged the farmers training on different topics at the village level.
	2.3	Farmers and workers are aware of the health and safety risk and its corrective measures, Only experienced persons are involved in high-risk jobs and pesticide spraying is only done by trained workers. Accident and Emergency procedures are written available in the ICS for verification. First aid kits were available with all audited farmers. ICS provided First aid kits to farmers.
	2.4	No works Unions are available. However, the negotiation is done by the workers with farmers. Wages are given based on minimum wages. Workers are allowed to interact with any external parties, there is no restrictions imposed on the workers;

	2.5	<p>Workers are employed temporarily according to their daily working needs. Farmers pay workers more than Minimum wages and the agreement is made mutually between farmers and employees before the design job. Normal working hours are 7 to 8 hours per day and no overtime activity is carried out.</p> <p>No wages deduction were observed and workers also confirmed that wages are not deducted for disciplinary purposes.</p> <p>Potable water is provided to the workers, which is the same used by the farmers. The Local government regularly test water quality and the test reports are available for verification in the local government office.</p> <p>As only temporary workers are employed there is no need to be provided housing.</p>
3 - Responsible Community Relations	3.1	<p>All farmers in the group are smallholders. Communication for farm activities and operations is made verbally in the communities.</p> <p>ICS has provided training to villages along with member farmers and workers on RTRS. ICS maintain a communication channel between stakeholders, interested parties and farmers, and communication records are available for verification.</p>
	3.2	<p>All farmers have land document proof available with them and they carry out the lands since 30-40 years ago.</p> <p>No disputes were noticed during the interviews. Verification of land records like Form B-1 and Khasara number.</p>
	3.3	<p>The complaint procedure is defined in ICS Manual and maintained at the ICS office. The farmers are aware of the ICS complaint mechanism.</p> <p>No complaints received so far; according to the procedure, the group have 2 months to solve a received complaint.</p>
	3.4	<p>Workers are employed from the same villages or nearby. ICS has imparted training to the farmers, workers and villagers on sustainable agriculture and anyone from the village can attend the session.</p> <p>All farmers are smallholders, so the agricultural inputs like seeds, fertilizers and pesticides are sourced locally.</p>

4 - Environmental Responsibility	4.1	Social, Agriculture and Environmental Impact Assessment was done for Soyabean cultivation in Madhya Pradesh state and conducted by SAEIP Gujrat, which is a third-party organisation. Training is given to farmers on improvement areas and farmers are found aware of the requirements. As per an interview with the manager, farmers and field observation found that the assessment is carried out in a comprehensive and transparent manner, also no negative impacts were found in the report, In assessment report clearly mentions the future planning and improvements needed.
	4.2	The Crop residue is incorporated into the soil to improve soil organic matter. As the farmers are smallholders the fuel is not stored, it is bought whenever required and used immediately. Empty agrochemical containers are disposed of in barren land and they are not reused. In this area some authorised empty CPP container collectors are available and they collect empty containers locally. Some farmers rines triple, puncture it and bury it in Barren land. Burning is legally prohibited. A small quantity of oil is required as the farmers have small landholding, also the oil is not stored as such, it's used immediately when bought. A Written plan is available on Residue management in the ICS.
	4.3	The system at the ICS monitors the use of fossil fuels in the farms, and the records of fuel usage are kept in the farm diary. Farmers confirmed that fuel use is decreased every year. Tractors and types of equipment efficient in the use of fuel are being used for farming. Native plant species are enhanced and planted to increase carbon sequestration. Ground covers are also maintained by the farmers. ICS provide awareness training on reforestation and also provided seedlings to the farmers. During the audit observed new plantations on the field and also verified the records. KML maps were available for verification. ICS is responsible for doing soil samples analysis and the results are communicated to farmers.
	4.4	No expansion on non-agricultural areas has been done. Farmers use their agricultural land to produce soybean for more than 30-40 years. No agricultural operations are carried out in the riparian zone. KML maps for fields of all farmers are available. Verification of KML maps found that farmers used only agricultural land for farming.

	4.5	<p>Farm maps with illustrations of native vegetation were found and a KML Map was developed through Google Earth.</p> <p>A Plan for implementing native vegetation is being carried out and the ICS prepared a detailed maintenance plan to ensure the expansion of native vegetation</p> <p>Hunting of wild animals/rare, threatened or endangered species is not done, also is legally banned. Awareness of this legal requirement is demonstrated in the interviews with farmers and workers.</p>
	5.1	<p>A Written Plan for Good Agriculture Practices plan is available, which includes the management of Water, Pests, Soil, Residue and nutrients. Plan available for verification.</p> <p>No groundwater contamination is observed, as evidenced by water testing made by ICS. In addition to that, soil sampling is made by a specific lab.</p>
	5.2	<p>The Watercourses like well and rivers are identified in farm maps and overview maps. No vegetation is removed from the riparian area and no wetlands are identified in the area. Native vegetation is maintained by the farmers.</p> <p>the group is composed of smallholder farmers with an average landholding of less than 4 ha.</p>
	5.3	<p>100% of soil testing is done, so all farmers are included in this procedure. For soil organic matter, the sampling is done every 3 years. Are available a pan for the soil testing and the same is available with the ICS. The results are in the Test Report RLA/Soil/Landmark/2021-2412</p> <p>As the topography of the area is flat and bunds are maintained around the farms, there is no chance of soil erosion in this area. Also, a cover cropping is maintained to reduce the chances</p>
	5.4	<p>The farmers are aware of the Integrated pest, nutrient and crop management plans. They are using light traps, crop rotations, chemical controls and homemade organic controls.</p> <p>The ICM and INM are documented and available to farmers. The use of chemicals and harmful products are just used under recommendation.</p> <p>The record of pests, diseases, weeds and natural predators monitoring are in the farmer's diary</p>

5 - Good Agricultural Practice	5.5	<p>All farmers are provided with farm diaries where they record the use and application of fertilizers and pesticides, as the person responsible for the application, the equipment and the Personal Protective Equipment. The weather conditions are observed by the farmers before the application and it is recorded in the diary as well. In addition to that, the Local government send daily notifications to farmers free of cost about the weather conditions.</p> <p>Manufacturers and ICS recommendations are followed by the farmer, and also they just use registered agrochemicals.</p> <p>The agrochemicals are stored in a room with a locked Key and with proper manners. In the sprayed areas the farmers use red flags to signal to avoid people entering those areas.</p>
	5.6	<p>Only legally approved chemicals are used and only my technical recommendation. Carbofuran and Paraquat are not used by farmers.</p> <p>The records are kept in the farmers' diaries.</p>
	5.7	<p>The farmers use Biological control, such as Trichoderma and Ladybird bittle agents for pest control.</p> <p>Farmers are aware of different pests and the biological control needed by each one. Both biologicals are permitted in India and they are recorded in the farmer's diaries.</p>
	5.8	<p>The agricultural department is responsible to identify and monitor invasive species and outbreaks of existing's pests. Farmers follow recommendations issued by the agricultural department in case of major outbreaks.</p>
	5.9	<p>Good agricultural practices are defined and documented by ICS. Soil bunds are maintained around farms, and the spraying of chemicals is not done near the watercourses, natural areas or residential areas.</p> <p>Farmers are aware of the weather conditions and the same is taken into account in the spraying planning.</p> <p>Aerial application is not performed.</p>

	5.10	Farmers use seeds from the previous year's harvest and also purchased from the local market. Seed purchase bills were available to farmers.
	5.11	Own seeds from previous year's productions are used by some farmers which are legally allowed in India.
Annex I: Chain of Custody System Requirements for Producers	1.1	<p>This is initial. The chain of custody requirements will be applicable for this unit. In the ICS manual Requirement and Procedures of the General Chain of Custody procedure are mentioned. During the audit, the ICS manual was verified.</p> <p>This unit will procure the soybean only from the registered farmers of the group.</p>
	2.1	This is the initial audit. The specification of the requirement is defined in the Manual with the number NB/RTRS/CR-01, however, it's not defined which document will have the information
	2.2	<p>This is the initial audit. The specification of the requirement is defined in the Manual and the procedure for invoicing is available.</p> <p>When the organization start procurement and sale then they will issue the invoice, In the draft invoice, they have a provision of identification of the organization (e.g. name, address, other relevant information) and quantity sold.</p> <p>The responsible operator prepared a summary for last year production and also estimated yield summary for the current year.</p>
	2.3	The Organization maintained completed and updated the written records, which cover all applicable requirements of the Chain of Custody Requirements for Producers. The records were available to check during the audit also, ICS managers confirmed that they save records for more than 5 years.

	2.4	The Organization as per the procedure set up Claim and Logo policy in the ICS manual, clearly mentioned that The RTRS certified material is always supplied with the proper documents.
--	-----	--

1.3.2. Group and Multi-site requirements

Principle	Applicant performance
1 - Group elements	<p>Group is managed by the organization Landmark Agri which is a legally registered entity as a proprietorship company. The group is formed as an ICS under the same legal entity.</p> <p>ICS Manual was available for verification and all farmers are located in Madhya Pradesh state and follow similar production practices. (Landmark/RTRS/VR 1.0)</p> <p>Group has appointed Mr Jitendra Mandrah as Project Head and is responsible for the implementation of RTRS requirements. Also, he has the authority to issue internal corrective actions and remove group members as stated in the manual. The organisation chart is attached with the manual on page number 4 - Roles & responsibilities are assigned to them to ensure the implementation of RTRS.</p> <p>Sufficient financial, logistic and infrastructure facilities are available and are adequate to manage the size of the group. as the human resources, one Project Head and 15 supporting staff are appointed for ICS management. The applicable taxes are paid by the organization and other registration fees as well.</p> <p>No limit is set to the number of group members Group members are composed of 2692 farmers. RTRS policy is maintained and signed by Mr Jitendra Mandrah</p>

2 - Group and multi-site management procedures	<p>Rules, procedures and responsibilities are documented in the ICS manual, number Landmark/RTRS/VR 1.0, and also the Organization chart is documented. All the necessary items are covered in the manual such as rules regarding the eligibility of members of the group, Withdrawal and suspension of group members, deadlines for NC closures, procedures for inclusion of new group members and complaint procedures.</p> <p>An internal control system is established to ensure compliance with applicable requirements. Staff are appointed for monitoring activities and ensuring compliance. Internal audits are also being conducted.</p> <p>The Farmers' training is organized by the ICS, on topics like RTRS requirements, GAP, Agricultural practices and social and environmental requirements. In addition, it was evidenced during the interview with farmers they are aware of the RTRS requirements.</p> <p>Information is presented to the farmers in the local language Hindi. Farmers signed applications and agreement forms were available for verification during the audit and verified compliance with the standard.</p>
3 - Control and monitoring of member/site compliance	<p>30% internal inspection was done in 2021, and ICS planning 100% internal inspection in a 5-year cycle. No members were excluded from certification as mentioned in the ICS Manual.</p> <p>In case of exclusion of farmers from the group, produce will not be considered and sold as RTRS certified soybean. The risk assessment is carried out for all members and the score of each farmer wise is maintained.</p> <p>The internal audits are done once a year and there were no major non-conformities identified. In case of those 30 days are given to address major non-conformity and 60 days for a minor, if failure the farmer will be excluded from the group.</p>
4 - Record keeping	<p>This is the first audit. All old records are maintained by ICS and were available for verification.</p> <p>The farmers' list is maintained with name, contact details, size of the farm, soybean area and village name.</p> <p>Map of farms and other relevant records are maintained</p>

5 - Chain of Custody	<p>As an Initial audit, there was not any sale of certified material done until the moment.</p> <p>The procedure for selling certified material is available in the ICS manual. As per the manual, only ICS is authorised to sell certified soybean, therefore Individual group members are not authorised to sell certified soybean. Also, only ICS is responsible for credit trading through the trading platform and the responsibility is restricted to Project Head.</p> <p>ICS has a system in place to maintain harvest quantities and sales details. The data is described on an excel sheet that was available during the audit</p>
-----------------------------	--

1.3.4. RTRS EU RED Compliance Requirements for Producers

Not Applicable - The client didn't applied for EU RED

1.3.5. RTRS Non-GMO Module Requirements for Producers

Not Applicable - The client didn't applied for Non-GMO

1.3.6 RTRS Non-Paraquat Module

Not Applicable - The client didn't applied for Non-Paraquat

1.4.1. Declaration of compliance

x	The applicant organization COMPLIES with the minimum indicators. Details of all indicators can be found in the corresponding section of this report.
	The applicant organization DOES NOT COMPLY with the minimum indicators. Details of all indicators can be found in the corresponding section of this report.

1.4.2. Conditions for Certification

Once certified, the Organization will be audited at least annually to monitor its continued conformity with all applicable certification requirements. The Organization will also be required to fulfill all the corrective actions (if applicable) within the given timeframes, as mentioned in this report.

Aiming to verify the continuity of the compliance check and implementation of corrective actions proposed, ACUC will conduct the annual surveillance audits in accordance with applicable requirements.

Estimate period for the next audit:	07/08/2022
Issuance date of the first certificate:	18/05/2022

2. First Surveillance Assessment General Details

Organization Name:	Landmark Agri Exports Private Limited
Country:	India
Contact person:	Mr.Jitendra Mandhrah
RTRS Standard used for the assessment:	RTRS Indian National Interpretation Version 2.0
	RTRS Responsible Soy Production Standard Version 3.1
	RTRS Group and Multi-site Certification Standard Version 3.2
Assessment Type:	Group
Partial certification:	No
Audit dates :	22.09.2022 to 01.10.2022
Total area (ha):	31856,92
Cultivated total area (ha):	30598,41
Estimated Production (Tonnes):	
Real Production (Tonnes):	60.275,46

2.1 Assessment process

2.1.1 Assessment team

Role	Name	Qualifications (including field of expertise)
Lead Auditor	Mr. Niketan Patil (NP)	B.sc in Agri- Business Managemet, MBA in Marketing, 6 Year Experieance in Sustainable Audits and Certifications) Conduct the opening and closing meeting; prepare the final report. Conduct audit processes principle 1 to 5, Annex 1 – Chain of custody for producers and G&
Observer	Pandu Kamla	Sarpanch-Village representative- Bitiya Village

2.1.2. Certification

Certificate code:	RTRS-CUC-AGR-COC-0099
CUC Certificate Code:	C880253AGR/COC.01-2023
Issuance date of the first certificate:	18/05/2022
Estimate period for the next audit:	September/2023

2.1.3 Assessment agenda

Date	Time	Site	Activity
22/09/2022	09:00 – 09:30	ICS Office	Opening Meeting
22/09/2022	09:30 – 12:00	Village- Digwad	Field visit- 2 units
22/09/2022	12:00- 13:00		Lunch
22/09/2022	13:00- 18:30	Village- Digwad	Field visit- 3 units
23/09/2022	09:00 – 12:00	Village-Alampur	Field visit- 3 units
23/09/2022	12:00- 13:00		Lunch
23/09/2022	13:00- 18:30	Village-Alampur	Field visit- 2 units
24/09/2022	09:00 – 12:00	Village-Alampur	Field visit- 3 units
24/09/2022	12:00- 13:00		Lunch
24/09/2022	13:00- 18:30	Village- Mardanpur	Field visit- 2 units
25/09/2022	09:00 – 12:00	Village- Mardanpur	Field visit- 2 units
25/09/2022	12:00- 13:00		Lunch
25/09/2022	13:00- 18:30	Village-Amirganj	Field visit- 3 units
26/09/2022	09:00- 12:00	Village-Amirganj	Field visit- 2 units
26/09/2022	12:00- 13:00		Lunch
26/09/2022	13:00- 18:30	Village- Amarpura	Field visit- 3 units
27/09/2022	09:00- 12:00	Village- Amarpura	Field visit- 2 units
27/09/2022	12:00- 13:00		Lunch
27/09/2022	13:00- 18:30	Village- Arora	Field visit- 3 units
28/09/2022	09:00- 12:00	Village- Arora	Field visit- 3 units
28/09/2022	12:00- 13:00		Lunch
28/09/2022	13:00- 18:30	Village- Digwad	Field visit- 2 units
29/09/2022	09:00- 12:00	Village- Digwad	Field visit- 2 units
29/09/2022	12:00- 13:00		Lunch

29/09/2022	13:00-18:30	Village - Mardanpur and Alampura	Field visit- 2 units
30/09/2022	09:00-12:00	Pandu Kamla-Sarpanch-Village representative- Bitiya Village	Stakeholder Consultation
30/09/2022	12:00-13:00		Lunch
30/09/2022	13:00-18:30	ICS Documents Verification in ICS office.	ICS office
01/10/2022	09:00-12:00	ICS Documents Verification in ICS office.	ICS office

01/10/2022	13:00-16:30	ICS Documents Verification in ICS office.	ICS office
01/10/2022	16:30-17:30	Open questions and preparation audit result.	ICS office
01/10/2022	17:30-18:30	Closing Meeting	ICS office

*Add or remove lines, if necessary

2.1.4 Stakeholder Consultation Process

Personal visits and phone calls were done in the local village and input supplier

2.1.5. Methodology of the audit time calculation

Total number of members of the Multi-site or Group:	9171
Risk elements identified by the audit team for sampling methodology:	Risk identification is done on the basis of available information locally, maps of the area, information from ICS, and based on the result of ICS risk assessment. All farmers are located in the same geographical proximity and follow similar production practices. As risk is identified in the Calculator as Low hence as per sampling is 39 farmers.
Sample calculation:	As per the CalculatorVersion-RTRS.CAL-AGR.T01 ENG v2.5
Sites randomly selected

Category	Number of members	Attributed risk	Shared characteristics of the set
Group 1	9171	Low	All farmers located in same geographical proxymtete, No Conflict with land found, No expansion for soy, No high levels of deforestation or native vegetation clearance for agriculture in the region.
Estimated time to evaluate the sites:			8 days for farmer visit (39 Farmers to be inspected), 2 days for document verification

Brief justification:	8 days for farmer visit (39 Farmers to be inspected & farmer document verification) + 1 day for ICS + 1 day for stakeholders. Total of 10 days of the audit.
-----------------------------	--

2.2. RTRS Principles and Criteria

Principle	Criteria	Applicant performance
1 - Legal Compliance and Good Business Practice	1.1	Farmers are well-informed about federal laws such as those pertaining to child labor, minimum wage, and others agriculture laws. Farmers are in compliance with legislation such as the environment protection act, minimum wage act, and child labor act, among other laws. There have been no documented violations of national or state laws. Farming is carried out on land that is legitimately held.
	1.2	Farming is done on legally owned land, Land ownership documents are available to farmers, Same can be verified Madhya Pradesh Government website- mpbhulekh.gov.in. ICS has a copy of the land document available at the office. Land documents verified of all selected farmers. Form B-1 of Farmers verified.
	1.3	An analysis of the potential social, environmental, and agricultural effects is carried out, and the findings and recommendations of the assessment team are shared with farmers. Social And Environmental impact assessment carried out by the third party. The assessment report was available for verification. Soybean cultivation in the Indian state of Madhya Pradesh is subject to an impartial third-party organization's assessment of its effects on society, agriculture, and the environment. Farmers are provided with instruction on where they can make strides, and it is established that farmers have a solid grasp of the norms. Continual improvement plan available for verification. All indicators are Monitored by the operator, and review results are available for verification.

	2.1	<p>No evidence of coercive, compelled, bonded, or forced labor was found throughout this assessment. Workers are hired from the neighboring villages based on an agreement reached between the farmer and the worker. According to the workers who were interviewed, they have the option to resign from their jobs whenever they choose. There are no permanent positions available; only temporary ones. Workers are hired from nearby villages based on a verbal agreement between both parties; the employer does not keep any of the workers' salaries, identity documents, or property. None of the farm's employees is under the age of 18. Temporary workers' spouses are not required to work. Spouses of employees are allowed to work under certain conditions. It has been noted that the majority of agricultural workers are women. The farmers and the workers come to an agreement about the terms under which temporary workers will be hired. There is no discrimination on the basis of caste, religion, or gender. Agricultural enterprises also make use of female laborers in various capacities. The government provides free and mandatory education up to age 15 in all of the villages where it exists. There are no child laborers on the farm. The ban on employing minors is well-known among farmers. The family also does not put their children in harm's way by having them work in hazardous environments. There isn't a single kid who doesn't go to one of the local schools. Men and women receive equal pay. There is no tolerance for sexual harassment, punishment, or verbal or physical abuse of any kind. Everyone who works receives good treatment. Verification of Documentation of employee eligibility, Participant observation, and interviews with both male and female workers.</p>
	2.2	<p>Due to a widespread illiteracy problem, it can be challenging to find legal agreements. To assist with agricultural activities, temporary staff members are frequently sought out and recruited. Both farmers and workers have reached a consensus on the amount of pay to be received. After conducting interviews with farmers, it was observed that it is standard practice for both parties to discuss pay and the scope of the assignment before any work begins. During agricultural activities, only contractual workers are hired when needed, and wages and working conditions are settled through negotiation between the worker and the farmer. The ICS is in charge of putting on training sessions for farmers. The farmers receive training on issues such as the requirements of RTRS, fundamental rights of work, health and safety, GAP, agricultural practices, and social and environmental requirements. Training provided to workers. Training record of workers at Village- Amirganj, dated- 14.06.2022.</p>

2 - Responsible Labor Conditions	2.3	<p>Farmers and workers are aware of the health and safety risk and their corrective measures, Only experienced persons are involved in high-risk jobs. Interview with farmer. He told that he received training on health and safety matters. During the spraying of Agrochemicals, they always used PPE kits and take other safety majors. Both farmers and workers are well-versed in the dangers of their profession and the ways they can be mitigated it. Health and safety risks are identified by ICS, which is responsible for Developing a procedure to address the risk and mitigate the same. Risk Assessment file No. 02 was verified during the audit. Interview with selected farmers, Available workers, ICS manager, and verification of Risk assessment file no.02. According to the findings of an interview with farmers, the only potentially dangerous employment is the activity of spraying, which is done by the farmers themselves and by laborers who have experience in the field. Farmers with small farms are more likely to apply the chemicals manually, which requires them to take protective measures such as wearing spraying coats, masks, and gloves. Employees are given protective clothing and equipment as a benefit of their employment. Farmers are aware of the dangers they face and where the closest main health center is located, provision for accidents or emergencies is available. During the interview with farmers, they explained the procedure. Also training register date-15.05.2022, was verified during the audit. Primary health center facility available in all villages, However, First aid was not available in the village of Mardanpur at the work locations of Farmers.</p>
	2.4	<p>All workers are employed on daily basis, No workers union are present . All workers are free to leave their job anytime. Workers are free to join or form union if they want. Interviews with the workers. Negotiation is done by the workers with farmers on the wages. Wages are agreed mutually. Wages are given based on the village level agreements. Workers are allowed to interact with any external parties. There is no restrictions imposed to the workers in any means.</p>

	2.5	<p>All workers are getting 350 INR for 6-7 hours of work. The minimum wage for the agriculture sector in the Maharashtra government is 350 INR for 8 hours. No deduction was observed in the wages paid. Workers also confirmed that wages are not deducted for disciplinary purposes. Only temporary workers are employed as per need. Normal working hours are 6-7 hours per day. No overtime activity is carried out. Usually, overtime is not carried out by agricultural workers, harvest and other peak works are carried out on a Piece work basis. Only temporary workers are employed during agricultural operations as per need. Overtime is normally required during harvesting however harvesting is normally carried out as piecework according to mutual agreement. Provision is given in the farm diaries to record working hours. Farm dairy of Selected farmers was verified and was up to date. No worker is paid on a result basis, Only piece work is carried out in this area which is calculated to go above the normal legal wages. It's observed that the water provided to the workers is the same as used by the farmer. Also it's observed that only temporary workers are employed and none of them are provided with housing.</p>
3 - Responsible Community Relations	3.1	<p>All farmers are smallholders. Communication for farm activities and operations is made verbally. ICS has provided training to villages along with member farmers and workers on RTRS. ICS record all communication details with farmers in File No.10- communication details. As discussed with Stakeholders and Farmers, Communication was made with them through ICS managers and Team. Regular communication was done between Producers and Community. Most of the farmers are part of the Community. Media used for Communication is Email, Telephone, Complaint boxes, and Posters in the Local language.</p>
	3.2	<p>No disputes were noticed during the interviews. All farmers have land document proof available. Verification of land records like Form B-1, Khasara number, and Interviews with the farmers. No case of disputed land use rights was observed. Farming is carried out on own agricultural land only. It also observed that farming is carried out for the last 30-40 years. It observed that each village's customs and cultures are followed by the villagers as observed through interviews with villagers and through physical observation.</p>
	3.3	<p>The complaint procedure is defined in ICS Manual. A complaint register is maintained at the ICS office and there were no complaints received so far. As per the complaint procedure, the maximum time to resolve a complaint is 2 months. Complaint registers-File nº11 was verified.</p>

	3.4	<p>As discussed with selected farmers Workers are employed from the same or nearby villages. Also, the same was verified with local community members of Village Mardanpura, and local workers. Both workers are from the same village. ICS has imparted training to farmers, workers & villagers on sustainable agriculture. As per the interview, it's understood that the training is carried out in villages and anyone from the village can attend the session. All farmers are smallholders. Agricultural inputs like seeds, fertilizers, and pesticides are sourced locally. Interview with local vendor. He confirmed that farmers purchase the input from local shops only. Also, Bills from selected farmers were verified at the time of the field visit. Training records for Sustainable Agriculture for Local Population available for verification, Training provided on the date 06/06/2022 and 14/08/2022.</p>
	4.1	<p>Social, Agriculture & Environmental Impact Assessment for Soyabean cultivation in Madhya Pradesh state is conducted by a third-party organization. Assessment report available for verification. Social, Agriculture & Environmental Impact Assessment for Soyabean cultivation is done in a comprehensive manner. All Factors Impacting Sustainable Soybean Farming are identified in the assessment. Critical gaps and recommendations are identified.</p>
	4.2	<p>Burning of crop residue or vegetation clearance through burning is not carried out. Crop residue is incorporated into the soil to improve soil organic matter. Burning is legally prohibited. All farmers are small and marginal landholders. Fuel is not stored, it is bought whenever required & used immediately. Agricultural waste is decomposed & used as Farm Yard Manure. Empty agrochemical containers are disposed of in barren land. In India all are small landholder farmers, So the government gives permission to bury empty containers in Barren land with the procedure. During field visits, however, farmers confirmed that oil is reused in the bullock cart, seed drill machine, spray machines, etc. A small quantity of oil is required as the farmers have small land holdings. Oil is not stored as such, it's used immediately when brought. The Farmers are aware of the residue management with respect to agricultural waste.</p>

4 - Environmental Responsibility	4.3	Farmers confirmed that fuel use is decreased every year. Solar trend also increased. Fuel-efficient tractors and equipment are used for farming. Provision is given in the farm diaries to record fossil fuel. For Smallholder farmers, ICS has taken soil samples and the results are communicated to farmers. Soil health card available with All selected farmers, During the Audit Soil health card verified. Native plant species are enhanced & planted to increase carbon sequestration. Ground covers are also maintained by the farmers.
	4.4	No expansion on the non-agricultural area has been done. Farmers use their agricultural land to produce soybean. No agricultural operations are carried out in the riparian zone. The cultivation is carried out for more than 20-30 years. Clusters Polygon shape KML Maps of Selected villages. Verification of land records such as form B1, and Khasara number.
	4.5	Farm maps with illustrations of native vegetation were found. KML Maps developed through Google Earth and Also Cluster-wise Polygone Shape Maps were verified for all selected villages. These are very small and marginal farmers, farm bunds and trees are available on the farm and are maintained. Where the riparian buffer is available the same is also maintained. Training is provided to the farmers on the importance of biodiversity & native vegetation Plan for implementation is available. Hunting of wild animals/rare, threatened or endangered species is not done. Hunting of these animals is legally banned. Awareness of this legal requirement is demonstrated in the interviews with farmers & workers.
	5.1	ICS has trained farmers on good agricultural practices. Soil bunds are maintained, and shallow tillage practices are followed to reduce soil erosion. Agrochemical application is done to the intended area. ICS prepared Crop calendar- File 4 to implement the Good Agriculture Practices. No groundwater contamination is observed by the ICS or farmers through physical verification. Local bodies regularly monitor the Groundwater. All selected farmers totally depend on rain only, and no irrigation for soybean done.

	5.2	Watercourses like well, rivers, etc are identified in farm maps and overview maps. All are Smallholder farmers with average land holding, Native vegetation like local plant species maintained by the farmers. Polygone shape Clusterwise maps are available for verification. No vegetation is removed from the riparian area. No wetlands are identified in the area. Native vegetation like local plant species is maintained by the farmers.
	5.3	Soil testing is done by ICS. Samples are analyzed in the Reliable Analytical Lab. Original reports are given to farmers. During the field visit reports are available with Farmers. Soil health card verified. The topography of the area is flat, bunds are maintained around the farms, and there are no chances of soil erosion in this area. Shallow tillage practices are followed. Green cover is maintained to reduce soil erosion.
	5.4	Farmers are aware of Integrated Crop Management and Integrated Pest Management techniques. Farmers use on the farm prepared organic pesticides and chemicals are used in minimum quantities. Light traps and crop rotation are used. A plan for ICM is documented and it is available. Harmful products are not being used. Only registered & less hazardous products are used. Manufacturers and ICS recommendations are followed by the farmers. During the audit Receipts of the Purchase of Agrochemicals were available with farmers. Bills verified of all selected farmers, Bills of Agrochemicals available for verification. Records of monitoring of pests, diseases, weeds, and natural predators are maintained in the ICS office. Field officers regularly visit farms and send the data to the ICS office, ICS manager records the data. Record of Monitoring pests, Diseases, and weeds noted in the farm dairies, Farmers monitor the presence of Pests, diseases, and Weeds recorded in the farm dairies. As discussed with selected farmers and field visits observed that farmers maintain natural predators- (ex. Lady bird bittle, Birds Observed on the farm).

5 - Good Agricultural Practice	5.5	Farm records are found updated with Agrochemical purchased, applied quantity, date of application, area of application, weather condition, etc. All data is maintained in farm dairy. During the audit Farm dairy was verified by selected farmers. They keep registering the person involved in agrochemical application and equipment used. During the interviews with the farmers, it was observed that most of the farmers who bought agrochemicals as and when required, had a good knowledge of the disposal process of agrochemicals containers. Farmers washed empty chemical containers three times and then buried them in the barren land. Some farmers have a chemicals storage which is locked and key. Transportation is done through farmers' vehicles. Farmers hosting red colored flags to avoid people entering recently sprayed areas. Fertilizers are used based on the soil test reports and guidance from ICS staff. Fertilizers are used based on the soil test reports and guidance from ICS staff.
	5.6	Only legally approved chemicals are used by farmers. No use of paraquat as explained by farmers during field visits and verification of farm diaries. No agrochemicals listed in the Stockholm & Rotterdam conventions are used. Paraquat and carbofuran are not used.
	5.7	Biological control agents are not used for pest control, but farmers are aware of different pests and their biological control.
	5.8	The agricultural department is responsible to identify & monitor invasive species & outbreaks of existing pests. Farmers follow recommendations issued by the agricultural department in case of major outbreaks. As discussed with farmers and ICS Staff no Major Pest attack or Out break happened.
	5.9	Good agricultural practices are defined & documented by ICS. Soil bunds are maintained around farms, No agrochemical zone is identified, and ICS has a guideline on the spraying of Agrochemicals, Same is communicated through training with Farmers. Aerial application is not carried out. No agrochemicals are sprayed near sensitive areas such as water courses, natural habitats & residential areas. Farm diaries of Selected farmers verified.

	5.10	Farmers following similar agricultural practices. Soil bunds are made to prevent contamination from neighboring plots, GMO soybean is not available in India, and ICS provided training to farmers on how to maintain buffer zone. Farmers have good knowledge of the same.
	5.11	Farmers use seeds from the previous year's harvest and also purchased from the local market. Seed purchase bills were available with farmers for verification, however, during the verification of farmer, he told that this year he purchase seeds from the market but he didn't collect bills from the vendor. Own seeds from previous years' productions are used by some farmers which are legally allowed in India.
Annex I: Chain of Custody System Requirements for Producers	1.1	This is the Surveillance audit for Landmark. The chain of custody requirements is applicable. As discussed with the ICS manager last year they deal only with RTRS Credits. The ICS manual has a procedure for handling certified soy from harvesting to storage. Training on general Chain of Custody System Requirements is provided by the ICS to farmers, training register is available for verification. As interviewed farmers, they have good knowledge of General Chain of Custody System Requirements. Interview with the ICS Manager, Farmers, and ICS manual verification. Training provided on the date 10/07/2022 verified. No third party is involved in the purchase of certified soy, ICS handles the purchase and sale by itself.
	2.1	This is the Surveillance audit for the unit, the specification of requirements is defined in the Manual, During the audit draft invoice was verified, on that Name, Address, Quantity, Issue date, quantity sold, RTRS Certificate number and other related information were mentioned. As per discussion with Mr. Jitendra, he told, that they sold only credits, physical soy not sales to date. Invoice was available for verification.
	2.2	The Organisation collected the information for last year's harvested yield and also submitted it to Control Union. To date, no physical transactions done only sale credits using the RTRS Credit platform.

	2.3	As per the interview, it was confirmed that they need to keep the records for 5 years. ICS manual procedure mentions it. Landmark keeps the records and it was available for verification.
	2.4	The specification of the requirements is defined in the Manual. As discussed with ICS manager they will send all RTRS certified material with Corresponding RTRS claim on there sales and transport documents.

2.3. Group and Multi-site requirements

Principle	Applicant performance
1 - Group elements	<p>Group is managed by the organization Landmark Agri, which is a legally registered entity as a proprietorship company. The group is formed as an ICS under the same legal entity. Group has appointed Mrs. Jitendra Mandhrah as Project Head, she is responsible for the overall implementation of RTRS. Field Officers and Field supervisors are also appointed by the organization. The organization chart is attached to the manual. Roles and responsibilities are assigned to them to ensure the implementation of RTRS. Sufficient financial, logistic, and infrastructure facilities are available. Human resources are also adequate to manage the size of the group. Applicable taxes and registration fees are paid by the organization. RTRS policy is being maintained, as verified policy dated 01/01/2021, and is signed by Mrs. Jitendra. The authority to issue internal corrective actions and remove group members is defined in the roles and responsibilities of the Project head as per the verified RTRS manual Landmark/RTRS/VR1. The group members willing to join the group are informed by the field officer who checks and gets the agreement signed. A preliminary assessment was conducted for all farmers by the field staff and records were available for verification. No limit is set to the number of group members and there is no restriction on the size of individual group members in the ICS Manual. There is no partial certification, all the group farms are under RTRS certification and are located in Madhya Pradesh state of India, same geographical & ecological area & following similar practices. Mrs. Jitendra Mandhrah is aware about the requirement of RTRS standards.</p>

<p>2 - Group and multi-site management procedures</p>	<p>Rules, procedures, responsibilities and organization chart are documented in the ICS manual. Responsibilities are defined on the ICS Manual. Rules regarding the eligibility of members of the group, withdrawal & suspension of group members, deadlines for NC closures, procedures for inclusion of new group members, and complaint procedure are mentioned in the manual. Farmers' training is organized by the ICS. Training on topics like RTRS requirements, GAP, Agricultural practices, and social & environmental requirements are imparted to the farmers. However, as per the interview with farmers of the village, Digwad is not aware of the RTRS requirements. The Organization has appointed employees with roles and responsibilities. Training and meetings are conducted regularly to raise awareness and transmit group requirements to the farmers. Farmers, those who are interested in RTRS need to submit an application form to join ICS. After that, a preliminary assessment is conducted to check the risk level of the farm, and based on the assessment farmer is approved or not. Agreement/document done between farmer and ICS that shows acknowledgment of farmer to follow group requirements, Agreements, and application available for verification. An internal control system is established to ensure compliance with applicable requirements. Procedures and rules are defined in the ICS manual. Staff is appointed for monitoring activities & ensure compliance. Internal audits are also being conducted to check the compliance of the farmers. Information is presented to the farmers in the local language Hindi. Training and meetings are conducted regularly to raise awareness and transmit group requirements to the farmers.</p>
<p>3 - Control and monitoring of member/site compliance</p>	<p>A preliminary assessment and internal inspections were conducted for all members as verified through an interview with the ICS Manager, Plan is to fix the frequency of internal audits based on the risk assessment internal audit was done. Farmers are categorized based on risk assessment. As verification of the ICS manual and Interview with the ICS manager. ICS has a procedure to maintain all records for 5 years. Last year's documents are also available for verification. An initial entry audit is conducted before admitting to the group, and records for the same are maintained. Risk assessment is carried out for all members and the score of each farmer wise is maintained. There were no major non-conformities identified during the internal audits but the procedure is defined in ICS Manual. The frequency of internal audits is set as once a year. 30 days are given to address major non-conformity. In case of failure, the farmer will be excluded from the group. But there were no major non-conformities identified in internal inspections.</p>

4 - Record keeping	Records to date from the start of certification are available. ICS has written a plan in the manual to keep records for up to 5 years. The farmer list is maintained with name, contact details, size of the farm, soybean area, and village name. Map of farms & other relevant records is maintained.
5 - Chain of Custody	As per the procedure mentioned in the ICS manual, only ICS is authorized to sell certified soybean. Individual group members are not authorized to sell certified soybean. ICS has a system in place to maintain harvest quantities and sales details. Last year's details are available for verification with ICS. Individual farmer is not authorized to sell certified soy. Certified soy will be traded only through ICS. The system is available to record harvest quantities and sales details. ICS is responsible for credit trading through a certificate trading platform. Access to the credit trade platform is restricted to Project Manager. Individual farmer is not authorized to sell credits or certified soy. Until the moment there was no purchase of RTRS physical soybean. Soybean processing operations are not carried out. No claims are made yet. Project Manger is responsible for RTRS-related communication and claims.

2.4 RTRS EU RED Compliance Requirements for Producers

RTRS EU RED	Criteria	Applicant performance
1 - Greenhouse gas (GHG) emissions from soy cultivation are measured and recorded	1.1	Not Applicable, EU RED is out of the scope.
	1.2	Not Applicable, EU RED is out of the scope.
	1.3	Not Applicable, EU RED is out of the scope.
	1.4	Not Applicable, EU RED is out of the scope.
2 - Land Use	2.1	Not Applicable, EU RED is out of the scope.
	2.2	Not Applicable, EU RED is out of the scope.
	2.3	Not Applicable, EU RED is out of the scope.
3 - Communication of information	3.1	Not Applicable, EU RED is out of the scope.

2.5 RTRS Non-GMO Module Requirements for Producers

RTRS Non-GMO	Applicant performance
Requirements for soy producers	Not applicable, Non-GMO is out of the scope.
Testing non-GMO Identity	Not applicable, Non-GMO is out of the scope.
Handling of material (Applies to soy producers and all organizations in the supply chain)	Not applicable, Non-GMO is out of the scope.

Use of RTRS Trading Platform for RTRS non-GMO credits	Not applicable, Non-GMO is out of the scope.
---	--

2.6 RTRS Non-Paraquat Module

RTRS Non-Paraquat	Applicant performance
Requirements for soy producers	Not Applicable. The module is no longer in use.
Compliance indicator	Not Applicable. The module is no longer in use.
Use of RTRS Trading Platform for RTRS non-Paraquat credits	Not Applicable. The module is no longer in use.

2.7 Certification proposal

2.7.1. Declaration of compliance

x	The applicant organization COMPLIES with the minimum indicators. Details of all indicators can be found in the corresponding section of this report.
	The applicant organization DOES NOT COMPLY with the minimum indicators. Details of all indicators can be found in the corresponding section of this report.

2.7.2 Conditions for Certification

Once certified, the Organization will be audited at least annually to monitor its continued conformity with all applicable certification requirements. The Organization will also be required to fulfill all the corrective actions (if applicable) within the given timeframes, as mentioned in this report.

Aiming to verify the continuity of the compliance check and implementation of corrective actions proposed, ACUC will conduct the annual surveillance audits in accordance with applicable requirements.

Estimate period for the next audit:	September/2023
Issuance date of the first certificate:	18/05/2022
